Period fo	The MAILING DATE of this commun r Reply	ication appe	ears on the c	over sheet with the c	orrespondence ad	ddress		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3612

DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim defines alternative structure contrary to statute. The acceptable phrasing is deemed to be --fixed on one of said frame and said floor panel--.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3612

5. Claims 1, 2, 4, 5, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihide et al. JP 2000-72048 in view of Takeshi, JP 6-136787, both cited by applicant.

Yoshihide et al. have the construction machine with floor panel 45 pivotally supported at front and operator's seat 17. Yoshihide et al. does not show structural detail at rear. Takeshi shows in figure 6 the claimed structural mounting of a cab rear including support member 4B, floor panel mount plate 15/19, and vibration insulators 20 interposed therebetween. No patent can be granted for claim limitations to fastening members, bolts or screws, between the floor panel 16E and the mount plate 15/19 as it is common knowledge in this art to fasten metal plates together with fasteners. It would have been obvious to one of ordinary skill to provide in Yoshihide et al. resilient mounting of the rear of the cab/floor as taught by Takeshi in order to improve the operator's environment and consequent work efficiency.

Note missing --at-- in claim 1, line 2 from the end.

As to claim 2, Takeshi has base plate 15 and mount plate 19.

As to claim 5, the use of male/female screw fittings is common knowledge in the art, obvious to use here for efficient fastening.

As to claim 10, Yoshihide et al. have tilt mechanism at 49.

6. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihide et al. in view of Takeshi as applied to claim 1 above and further in view of Lee.

It would have been obvious to one of ordinary skill to provide in the references above a tilt stopper as taught by Lee at 20/22 in order to prevent overtravel of the cab/floor.

As to claim 8, see pin 24.

Art Unit: 3612

Allowable Subject Matter

7. Claims 3, 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gronlund shows another tilt stop. Okazawa et al. detail a resilient support.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667. The examiner can normally be reached on 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn D. Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000. Dennis H. Pedder
